

A photograph of a row of blue Fermob chairs in a modern interior setting. The chairs are arranged in a line, receding into the background. The lighting is soft and even, highlighting the smooth, curved surfaces of the chairs. The background shows a blurred view of a modern building interior with large windows and structural elements.

FERMOB

IN A FEW DATES

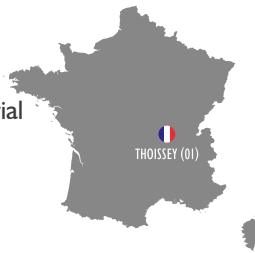

WELCOME

TO FERMOB

A French company that relies on three high-performance industrial sites located near Lyon

- Thoisse: 14,000 m²
- Macôn: 10,000 m²
- Anneyron: 24,000 m²
- Including more than 330 employees
- Turnover of € 127,3 M in 2023

Manufacturing with creative added value

- In-house design studio

A strong reputation in France and abroad, among the general public and professionals

- Marketing in more than 65 countries
- 50% of turnover from exports

Strong values deeply rooted in the culture of the brand and the company

- Joie de vivre
- Affordable
- Inspiring
- Detail-oriented

Fermob: Metalwork

- A splendid and inspiring material
- More than 5,000 tonnes of metal (steel and aluminium) transformed annually
- More than 690,000 parts manufactured annually
- More than 200,000 metal Bistro chairs manufactured in the Thoisse factory each season

Expertise: the mastery of colour

- A unique colour palette with a colour chart composed of 25 colours, updated every year to combine, attract and inspire...

You can use our product daily all over the world :

Times Square, New York - USA

Coca-Cola Museum, Atlanta - USA

Grace Santorini Hotel, Santorini - GREECE

Molitor, Paris - FRANCE

McDonald's, Lyon - FRANCE

Bikini Hotel, Berlin - GERMANY

Maxx Royal Hotel, Antalya - TÜRKİYE

FERMOB

THE ART OF GOOD LIVING FOR EVERY SPACE

For over 30 years, Fermob has been creating a universal and immediate link between the environment and its inhabitants, bringing reality to moments of life, where art and lifestyle are guided by high-quality, meaningful design.

The French brand adorns the world's largest squares as well as tiny Parisian balconies, while also breathing its boundless, colourful energy into every space. Its furniture has timeless appeal: the perfect illustration of French style that has been adopted world-wide. In fact, its products can be found from Times Square to the Sydney Opera House, from bustling Japanese streets to Berlin squares, and from the Villa Medici to the Champs-Élysées.

Today, more than ever, the brand with the samara logo gleefully plays around with trends in furniture, lighting and accessories, defying the boundaries and restrictions between indoor and outdoor spaces and advocating intelligent use and good design.

The furniture features new combinations of materials and colours to create a stylish presence in any room of the house, whether as a subtle accent, a centrepiece or a colourful touch.

Multi-purpose lamps design atmospheres to set the mood from the garden to the living room, combining ingenuity and simplicity to underscore their indispensable presence.

The result?

Avant-garde pieces by designers who blend expert craftsmanship with industrial performance and creative audacity to meet the flexibility needs of today's spaces and innovative uses.

A colour chart with 25 shades (including three new ones) and a range of clever accessories to create lasting emotions for unique locations that reflect every personality and atmosphere.

Once again this year, Fermob is extending its horizons with new materials and exploring all areas of expression to help individuals and professionals alike in their quest to furnish their spaces, offering a host of iconic products to be rediscovered as well as new products.

In the open air or inside the home, we all have a Fermob experience to enjoy.

FERMOB

THE COLOUR EXPERT

For almost 30 years, **Fermob has made colour its hallmark**. Very early on, Bernard Reybier understood that colour is much more than just a finish. Colour defines a space, reflects personality and emotions, sets a room apart, adds style to a terrace and **brings furniture to life**.

In a market that was initially limited to two colours (white and English green), Fermob galvanised the sector by offering an **original range of bright, intense and contrasting colours**. Nowadays, the brand is expanding its **colour expertise** with more subtle shades that allow you to **create your own palette** and **play with contrasts and harmonies** to give character to your spaces.

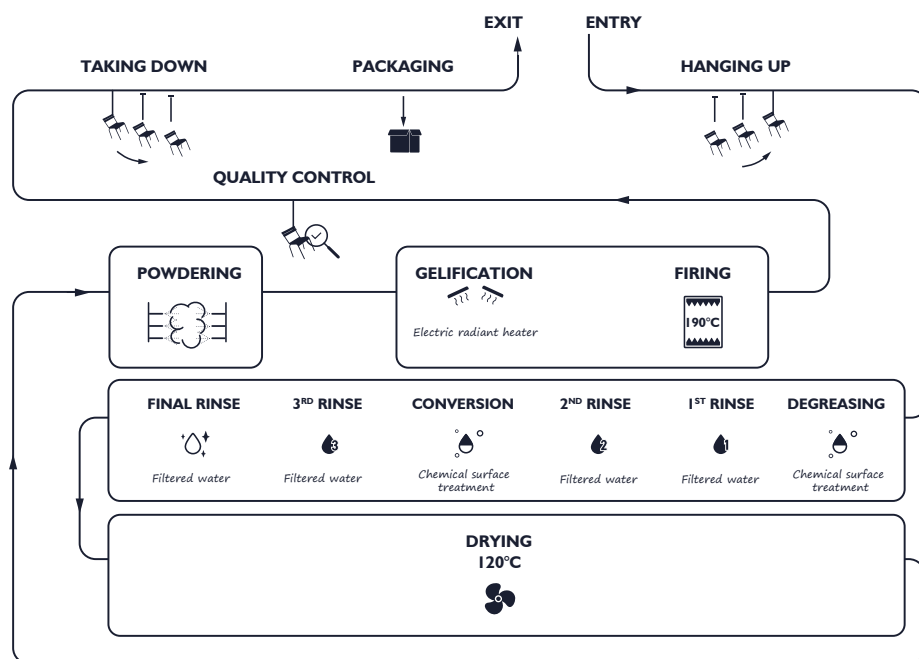

With **25 unique colours**, designed not only to be used on their own, but also to complement and enhance each other, the range offers an infinite number of combinations **to create inspiring and one-of-a-kind interior and exterior spaces**.

And to give its colour chart a boost, the brand regularly develops new shades. This season, **three new options** have been added to the Fermob colour palette.

Fermob's **colour experts** develop a wide range of shades, whether soft and soothing or bright and vibrant, timeless or daring. Before each launch, intensive tests are carried out to ensure that the colours are suitable for **demanding outdoor use**, guaranteeing:

- long-lasting colour
- scratch resistance
- UV resistance
- moisture resistance

In terms of production, the company has invested heavily in its facilities, and now boasts the **world's most efficient painting line** in its market! A **colour change** takes just **six minutes**, and the 25 shades on the colour chart can be applied over three days, making this **impressive industrial** tool both **flexible and responsive**.

Painting process on the historic Thoissey site

All Fermob metal products are painted with a **100% polyester powder coating**, which has higher UV resistance than the epoxy paints generally found on the market. Paint is applied **electrostatically on the furniture for optimum coverage**, and then the product is baked at a high temperature.

To improve anti-corrosion performance, surface treatments (galvanising, electro-galvanising, electrolytic coating) are added before standard or optional painting.

NEW METAL COLOURS

2024–2025 SEASON

Feeling like a change of scene? Drawing their inspiration from the sunny lands of South America, the three new colours in the Fermob colour chart invite you on a journey...

Intense, energising or soothing, each colour has a distinctive character that will add a personal touch to gardens and terraces, and make a wonderful addition to indoor spaces!

When combined, they take you on a journey back in time, adding a touch of retro style and boldness to your furniture.

TONKA

The embodiment of the rich earthy and woody tones of the lush Amazonian forests, Tonka brings a subtle **touch of sophistication** and mystery to the Fermob colour palette. With its blend of vanilla, almond and caramel notes, the tonka bean, prized for its rich, complex aroma, is perfect for sharing quality time with the family. Paired with our shades of green and warm colours, this deep, nature-inspired brown recalls the **softness of autumn**. Visually **comforting and warm**, Tonka beautifully complements our interiors and is a perfect match for wood and leather.

CANDIED ORANGE

Picture yourself strolling through the stalls of a colourful market in Rio, where the sweet aromas of citrus fruit fill the air. Head towards an exotic, gourmet destination, where every moment is an invitation to savour the *joie de vivre*. Both **sweet and tangy**, Candied Orange is **generous and intensely coloured**, offering an explosion of flavour and colour! This **vibrant, dynamic** shade is extremely punchy, adding a touch of luminosity to the Fermob colour chart. Combined with our palette of warm colours, it is reminiscent of summer, sunsets and holiday memories. Looking for a 70s vibe? Simply combine small touches of Candied Orange with our blues and our new Tonka shade.

MAYA BLUE

A blend of the cultural heritage of the ancient Maya and a deep connection with nature and the cosmos, Fermob's new blue is guaranteed to get people talking! This **rich, deep and soothing** colour brightens up our colour chart, **bringing elegance and serenity**. Maya Blue captures the clear skies of sunny days and the crystal-clear waters of Yucatán's sacred cenotes, offering a feeling of boundless **freedom**. This shade enhances our colour palette, blending with our pastels and mineral shades for a soft, gentle atmosphere, and adding **freshness and brightness** to our palette of blues and greys. The secret for a bold pairing? Combine it with Black Cherry or Gingerbread.

THE METAL

WONDERFUL MATERIAL OF IDEAS

For its furniture, Fermob has chosen metal, Gustave Eiffel's formidable «**material of ideas**». This material is ideal because of its flexibility of use, adapting to **diverse and innovative designs**, but also because of its **sustainability** and **impressive recyclability**.

Steel and **aluminium**, our main raw materials, are **metals that can be recycled ad infinitum**, with no alteration. They boast a **recycling rate of up to 98%**. This remarkable recycling capacity means that our products can be reintroduced into the production cycle almost indefinitely. What's more, these materials are **extremely strong and resistant**, ensuring that our products are able to withstand the weather and wear and tear over time, guaranteeing a long service life.

STEEL

- Fermob's original expertise
- Stable and durable
- Creates an elegant design

ALUMINIUM

- Malleable
- Light-weight
- Easy to weld

Whenever our designers and technicians are working on a new product, **anti-corrosion performance is always top of mind**. We're constantly thinking of ways to eradicate, or at least reduce, areas that could be prone to corrosion because they are not protected or treated.

Examples of **corrosion-prone areas** include: rims under table tops, air gaps, tubular parts, areas subject to friction, such as folding mechanisms, areas where the properties of the material have changed as a result of heat (such as from laser cutting or welding).

ANTI-CORROSION PROTECTION RATING

Fermob has introduced a new **Anti-Corrosion Performance Rating (IPAC)** for all metal items of furniture. The rating is an indication of the product's anti-corrosion performance, combining three factors: **design, material and surface treatment**.

Since all our items of furniture are designed for outdoor use, we systematically apply a surface treatment and high-performance outdoor paint to offer the very best protection against corrosion.

On a scale from 1 to 10, all Fermob furniture has a minimum IPAC rating of 6.

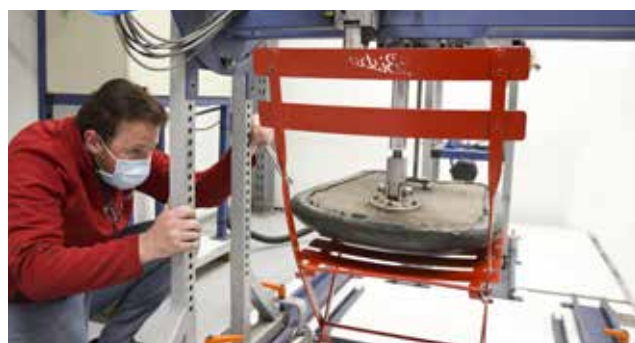

All products bearing this logo are eligible for additional, **optional anti-corrosion treatment** (contact our sales department).

The 1st figure gives the basic rating and the **2nd figure in the upper right-hand corner gives the IPAC after additional treatment**. Depending on the products and their design, the IPAC enhancement may be different.

Fermob furniture benefits from anti-corrosion treatment specifically for outdoor use and undergoes intensive tests at our laboratories, in accordance with **general standards on safety** (NF EN 581-1), **stability** (NF EN 1022), and **resistance and durability for collective use** (NF EN 581-2, NF EN 581-3).

FERMOB

A SELECTION OF MATERIAL COMBINATIONS

MULTI-MATERIAL PRODUCTS

Metal can also be combined with other materials to create unique, long-lasting pieces. For our **outdoor products**, we use materials such as **outdoor textiles** developed in collaboration with some of the most demanding and reputed suppliers on the market. Examples include **Outdoor Technical Fabric** (PVC-coated polyester), braided polymer wire, and teak.

OUTDOOR FABRICS

OUTDOOR TECHNICAL FABRIC

WIRE

TEAK

For our **indoor products**, we have selected materials intended for indoor use only, such as **leather**, **100% recycled indoor fabric**, **oak** (veneer or solid wood), and innovative **FENIX®**. These materials offer elegance and style for indoor use without compromising on the remarkable quality or durability of our furniture.

LEATHER

100% RECYCLED FABRIC

OAK

FENIX®

OUTDOOR MATERIALS

OUTDOOR TEXTILES

The cushioned furniture (as well as some textile accessories) use **Sunbrella® fabric by Dickson, the French outdoor fabric specialist. 100% solution-dyed acrylic**, Sunbrella® fabrics are designed for **outdoor use**.

WHAT MAKES A GOOD OUTDOOR FABRIC ?

- A fabric that has **technical qualities enabling it to withstand sustained outdoor use without deteriorating** (colour-fastness to UV rays, water-repellent, resistant to stains and mould, etc.)
- A fabric that's **easy to keep clean** (removable cover, machine-washable, etc.).

Colour-fast
in the sun

Water-repellent

OUTDOOR TECHNICAL FABRIC (DUO OR STEREO)

We use Batyline® **Outdoor Technical Fabrics** (OTFs) on our products, sourced from market-leading **French manufacturer Serge Ferrari**. The fabrics are made from **high-tenacity 100% polyester thread, protected with a solution-dyed PVC cover**, guaranteeing:

- a hard-wearing, tearproof product (can withstand loads of up to 4 tons per square metre)
- a seat that doesn't sag (the fabric retains its shape after use)
- a design look that lasts.

The manufacturer handles **all four phases of the production process in-house**:

- creating the polyester thread (core)
- extruding the PVC thread (cover)
- weaving the fabric
- heat weld the fabric.

Batyline® is the **best-performing outdoor fabric money can buy**. The Stereo fabric is developed **exclusively for Fermob**.

Batyline® is **particularly suited for an outdoor use** because it:

- is UV-resistant (colours do not fade over time)
- stays cool
- does not hold water
- anti-mould and anti-stain treated
- hypoallergenic
- offers a flexible and comfortable seat that retains its shape
- is easy to clean with soap and water.

Serge Ferrari

Batyline® DUO
(Cactus)

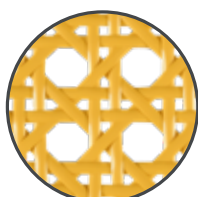

Batyline® STÉRÉO
(Rosemary)

WOVEN POLYMER THREAD

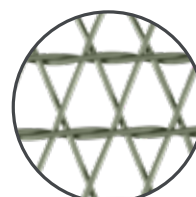

The seats in the **Croisette, Sixties and Parisienne 21** collections are handwoven on an aluminium frame. The wires are made from resin (polymer) before being **braided by hand, the traditional way**. This means that each item is unique, and requires 8 to 19 hours of manual work.

Collection Croisette

Collection Parisienne 21

Collection Sixties

The **Croisette** and **Parisienne 21** collections reinvent **traditional wickerwork**, using **textured flat weave**.

The **Sixties** collection stands out with its visually **striking retro effect**. The seats are braided using a **round “scoobie” weave**.

TEAK EXPERTISE IN THE FERMOB GROUP

Fermob relies on the **teak expertise of Vlaemynck** (a brand in the Fermob group), and uses the same supplier.

Teak is an exceptional wood; it is used in shipbuilding because of the protection provided by its naturally occurring oleoresin. It is rot-proof, withstands the action of insects, inclement weather and the passing of time. **The king of woods for outdoors**, teak requires no maintenance to keep its technical characteristics: robustness, longevity and ease of use.

The teak we use has come from the same factory for 30 years, sourced exclusively from legal tropical plantations that can ensure the **longevity of the species and protect the environment**.

The teak used by Fermob is:

- Natural: **untreated and un-oiled**. It fades to grey after a year, producing a patina that enhances its authentic feel and contemporary style. It requires no maintenance.
- Grade C: it has knots and other **natural patterns which prevent a uniform appearance**.

Teak showcases Fermob's work on the materials, giving the items of furniture a **warm look and a comfortable feel** (as teak stays cool).

INDOOR MATERIALS

LEATHER

Developed in collaboration with Childéric Sellier, expert saddle-maker and manufacturer of quality leather work, our leather products epitomise **industrial know-how and craftsmanship**. We prefer to use **full-grain leather** to preserve the integrity and nobility of this material. Its distinctive features, such as wrinkles, veins and pores, bestow **unique character upon each item**. Our leathers receive a **semi-aniline finish** that combines a layer of aniline with a layer of pigment to ensure uniform colours without compromising their resistance to dirt.

The leather used for Surprising is a **Spanish ox leather**, selected for its **robustness**; it is designed to last for years. This leather is tanned using plant-based techniques and **solution-dyed**, offering a regular finish and a high quality coloured edge. **Scotchgard** fabric protector is applied to reinforce its resistance to water and protect it against stains and ageing, thus guaranteeing **long life**.

The slats of the Bistro chair are covered with **French calf leather**, known for its **superior quality and durability**. This leather undergoes **mineral tanning** and is **solution-dyed**, ensuring **excellent resistance** and protection against the hazards of everyday life; its natural beauty is thus preserved to ensure long life.

RECYCLED FABRIC

For our **fabric Studie chair and bridge armchair**, we have carefully selected a fabric that offers **comfort and beauty for indoor areas**.

We opted for an **eco-designed fabric**, made from **GRS** (Global Recycled Standard) certified thread, for guaranteed traceability and control over the production line. Comprising **100% recycled materials**, it is made from 60% recycled cotton and 40% recycled polyester. This fabric requires no additional dyes or chemical/synthetic products for its finish, **in compliance with even the strictest ecological standards**. Its **soft feel** and **mottled design**, obtained by braiding different coloured threads, ensure its unique, attractive charm.

OAK

At Fermob, we use oak in two of our collections: **Studie and So'o**. The oak that we use is carefully chosen to highlight the **aesthetic and technical qualities of this noble wood**.

For our Studie range, we use **top quality oak veneer**. The veneer is chosen for its natural beauty, bringing **timeless elegance** and **natural warmth** to our furniture, while guaranteeing **superior durability**.

For the tops of our **So'o oak** tables, we have carefully selected **superior, QF-1A grade** solid oak, reputed for its **exceptional quality**.

QF-1A grade oak, compliant to standard **NF EN 975-1**, displays the following properties:

- Regular dimensions: it is sawn into planks of the same dimensions;
- Superior quality: it has no major defects, in compliance with the highest quality standards;
- Colour and grain matching: the planks are meticulously selected and put together to ensure visual consistency in terms of colour and grain pattern.

These properties mean that our furniture **will withstand the tests of time**, ensuring particularly long life.

FENIX®

Innovative material developed by Arpa Industriale, **FENIX®** is a true **revolution in design**. It is mainly composed of layers of paper soaked in thermoset resins, then polymerised to obtain its final structure.

This material offers **excellent resistance to scratches, durability, easy cleaning** and a modern style, making it the perfect choice for tables, kitchen counter tops, desks and other indoor surfaces. These are its main properties:

Low light reflectivity,
extremely matt surface

Soft touch

Anti-fingerprints

Thermal healing of superficial
micro-scratches

MAKE A LASTING IMPRESSION,

BUT NOT ON THE ENVIRONMENT!

Designed for use in natural settings, all of Fermob's products are made using materials and processes that limit their environmental impact as much as possible. Fermob's design and aesthetic choices have always taken essential environmental priorities into account. From the design stage to the end of the product's life, Fermob is committed to addressing environmental issues. The CSR commitments adopted for over 35 years by Fermob are assets and strong selling points for our customers, as they represent a genuine competitive advantage.

ECO-DESIGN

METAL, A RESPONSIBLE CHOICE

Our two main materials—iron and aluminium—are **98% recyclable materials**, and benefit from one of the most mature recycling channels in the world.

PAINTS THAT PROTECT THE ENVIRONMENT AND HEALTH

The powder coatings used by Fermob are **solvent free and recyclable**. They are applied in a **zero-waste system**, with a series of baths guaranteeing outdoor use.

Zero discharge of polluted water:

measures to balance the successive baths in the surface treatment tunnel.

Zero air emissions:

the heat from the furnaces is even recovered to heat the metal treatment baths.

Zero powder discharge:

100% solvent-free polyester powder coating, applied without water, in a closed-circuit operation. The powder that is not bonded to the furniture is vacuumed up and reused.

The fact that Fermob's production facilities are listed as an **Installation Classified for the Protection of the Environment (ICPE)** means that the company has obligations and responsibilities in line with its **commitment to being a responsible manufacturer**. This commitment is also reflected in our participation in a programme for monitoring hazardous substances discharged into water (RSDE).

REDUCING ENVIRONMENTAL IMPACT: AN ONGOING FOCUS

The optimisation and sobriety of energy consumption and water resources are a major concern for Fermob, as has been demonstrated regularly in the form of **practical actions**:

- **Lowering the temperature** used for our heating processes (-10 °C compared to 1998),
- Installation of a **drying system with reduced consumption** (-10%),
- Investment in a **painting line**, which will save eight tonnes of powder per year,
- **Reduction in our water consumption** (-43% between 2015 and 2021),
- **Reduction in our electricity consumption** with the integration of **LED lighting** since 2012.

INTERNAL INDICATORS TO PROMOTE THE REPAIRABILITY & RECYCLABILITY OF OUR PRODUCTS

To demonstrate its commitment to creating long-lasting products, the Group has developed two additional indexes that are specific to Fermob:

- The IREP repairability index
- The IRCY recyclability index

These indexes, which have been **part of the design process of our products since 2019**, are intended to highlight our virtuous approach to product lifespan, while preserving our head start in the fields of repairability and recyclability.

The repairability index (IREP) was the first to be formalised after discussions were initiated in 2018. It assesses the repairability performance of our products, which depends on a combination of three factors: **how easily they can be taken apart, availability of spare parts, and the degree of technical expertise required for repairs.**

IREP enables each of our products to be graded on a scale from 0 to 2:

Cannot be repaired

Can be repaired by a professional with access to specific tools or expertise

Can be easily repaired by private individuals using simple tools (e.g. screwdriver)

As for **the recyclability index (IRCY)**, it measures the recycling potential of products at the end of their lives. It considers **the types of materials used to make the product, the presence or absence of recycling obstacles** (ease of material separation, electrical or electronic components, etc.), and **the maturity of the recycling processes.**

The classification thus comprises three categories, represented by a specific colour code:

Non-recyclable

Mostly recyclable

Totally recyclable

In the context of this continuous improvement initiative, these indexes, proactively created by Fermob, are designed to evolve. They will be adapted as the months go by to include increasingly precise score criteria.

MEASURING AND PROMOTING THE ENVIRONMENTAL IMPACT OF OUR PRODUCTS

Whether it's using the **right amount of raw materials, limiting our production waste, optimising our packaging or developing solutions** to ensure the sustainability of our products, **eco-design** has been part of our DNA for over 30 years.

In addition to developing our in-house IREP and IRCY indexes, we have decided to carry out **Life Cycle Analyses (LCA)** of our products. The LCA relies on a scientific approach:

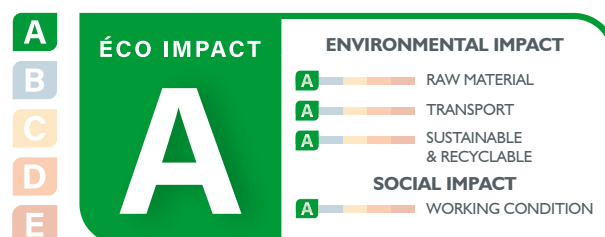

- **multi-stage**, taking into account every stage in the life of a product
- **multi-criteria**, evaluating between 12 and 16 criteria for impacts on air, water, biodiversity, climate, etc.

This allows us to determine the **environmental impact** of our furniture and lighting. To date, the Fermob Group is **the only French manufacturer** in its sector to carry out this assessment for **all its product references** (excluding accessories).

The goal of this approach is twofold:

- Improving the environmental performance of our existing and future products.
- Highlighting our efforts and expertise in sustainable design.

For our furniture, the results of each of our LCAs are expressed as a score, a letter associated with a colour, which provides **clear and informative insight** on the environmental impact of our products. As such, 87% of Fermob products have been awarded an A or B classification (including 57% A), meaning that Fermob furniture is among the most sustainable on the market. This is a real source of pride and recognition of the work we have been carrying out for many years. The 'A' classification is awarded to 20% of the best products on the market, all brands included. This proactive approach, which is unique in its scope, has enabled Fermob to anticipate many of the legal requirements for labelling in the furniture sector. Fermob is already sharing this information via fact sheets available on its websites (B2C and B2B).

We are working closely with Eco Impact, an independent third-party partner, to guarantee the authenticity and accuracy of this score. This means that we are fully aligned with our commitment to providing **clear and transparent information** to our customers.

EXTENDING SERVICE LIFE THANKS TO SPARE PARTS

In order to **extend the service life of our products** and **promote their durability**, certain components can be replaced in the event of wear or deterioration over time. In our catalogue, we offer a wide range of **spare parts** for **furniture** and **accessories**, including protective pads for chairs and tables, glide pads and cushion covers. We also offer spare parts for **lighting products**, such as diffusers and power supplies.

See our price list for a detailed list of spare parts

MANAGING END OF LIFE

Fermob has been working with Ecomaison since 2013; this eco-organisation collects and restores used furniture to give it a second life or ensures the recycling of its materials.

Ecomaison's missions are to collect and sort used items of furniture, and to meet the recycling and recovery targets set by public authorities. Fermob commits to this process by:

- Upholding a long-standing tradition of creating **eco-designed** products
- **Informing and raising awareness among its consumers** on the use of eco-participation
- **Promoting donation and reuse** in partnership with players from the non-profit sector

RECYCLED AND RECYCLABLE PACKAGING

For many years, Fermob has been a member of **CITEO**, our **eco-organisation tasked with collecting and sorting packaging**. As such, Fermob contributes to turning its everyday products into new resources and promotes 'limited packaging': packaging that is eco-designed and uses a minimum of raw materials.

In compliance with France's AGEC law of 10 February 2020 (anti-waste law to promote the circular economy), we use the TRIMAN system on our labels to inform consumers of the waste sorting rules concerning our furniture, accessories, lighting products, its packaging and documentation. The TRIMAN logo comes with an information box indicating the sorting or waste disposal instructions for the various elements.

RE-PAINT

GIVE NEW LIFE TO YOUR FURNITURE

FERMOB STRENGTHENS ITS ENVIRONNEMENTAL COMMITMENTS

With repaint, Fermob is strengthening its environmental commitments by offering its customers a way to extend the lifespan of their products.

Fermob has joined forces with Axalta, its paint supplier and long-standing partner, to offer a brand-new solution to renovate your Fermob furniture, **via a certified network of galvanisation re-paint professionals. Available in France for now.**

Exclusive partnership with:

HOW DOES IT WORK?

1. Submit your request online via <https://re-paint.com/renovation-fermob>, selecting your nearest painting renovation professional.
2. Fermob checks the authenticity of the furniture, then sends the request to the re-paint professional who validates the feasibility of the renovation and proposes a quotation.
3. After validation of the quotation, you drop your Fermob furniture off at the premises of the re-paint professional.
4. The re-paint professional renovates your furniture.
5. The carefully-finished result will last for years!

KEY FIGURES

- More than 160 eligible Fermob products
- A selection of 15 exclusive Fermob colours
- A network of around forty professionals in France, located within 80km of your address.

Respect of the environment FERMOB STEPS UP ITS COMMITMENTS!

Since the company was founded, **Fermob has naturally strived to protect its environment and create sustainable products:** solvent-free and water-free paint, recyclable materials for its furniture, zero-waste painting process, heat recycling, workstation ergonomics, etc. Our entire manufacturing process complies with the **highest quality standards.**

Today, Fermob takes another step forward, completing its environmental commitments with a **local paint renovation network:** re-paint. Not only does this solution extend the life-time of your Fermob furniture, but being local, it limits the transport involved in the operation and thus **its carbon footprint.** This ambition corresponds perfectly to the challenges of our social responsibility and the changes in our lifestyles.

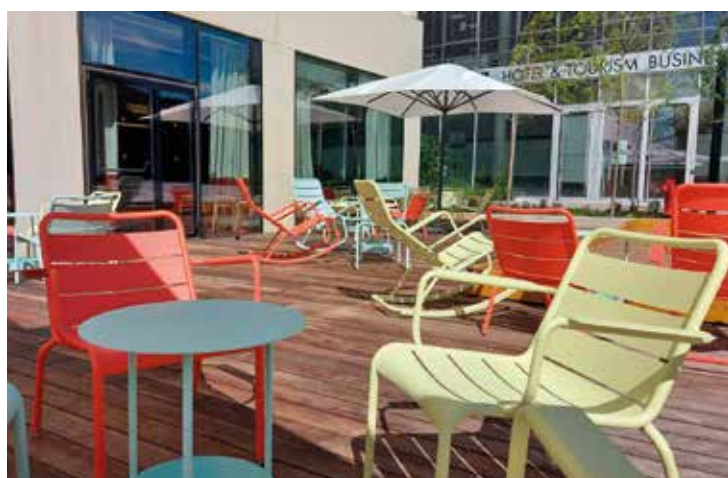

FERMOB CONTRACT

A DEDICATED CONTRACT DEPARTMENT FOR PROFESSIONAL PROJECTS

As professional outdoor spaces are the showcases of both private and public institutions, they must be **personalised** and **attractive**, and **thought must be given to their every aspect** - furniture, lighting, parasols and decorative accessories - **to create uniquely styled, complete layouts for all professional outdoor spaces.**

Professional markets are long-standing markets for the Fermob brand.

The Bistro chair, created from the Simplex model (a Fermob patent dating back to 1889) used to be sold to lemonade sellers! Since then, our professional catalogue has grown to **400 pieces** across over **60 collections**, a large selection that doesn't even include adaptations, customisation and bespoke pieces.

MARIOTT HÔTEL RENAISSANCE, BORDEAUX - FRANCE

HOTEL MOLITOR, PARIS - FRANCE

To coordinate our activity and offer the highest level of service, **team of 40 people within the Contract department is exclusively dedicated to consulting and professional projects:** layout advice, developing 2D/3D plans and 3D files for your mock-ups, special articles, customized services, installation and assembly.

TIDEHOUSE STUART - USA

SUPPORTING YOU IN ALL YOUR PROJECTS

Architects, landscape designers, project retailers, designers and decorators play a key role in the choice of furniture for large layout projects. This is why Fermob supports them by keeping the documentation up to date (metal and colour charts, catalogues, technical documentation, etc.) and by providing them with 3D files for drawing up their layout plans for projects in the hotel and catering industry, for public spaces or office exteriors.

Find all our collections modeled on Pcon. **pCon**

APICIUS, PARIS - FRANCE

The Fermob Contract Unit team of interior designers and shop-fitters works in various fields such as the design of terraces, swimming pools/spas, balconies, rooftops, hotel rooms, entrance halls, public spaces, office exteriors, reception areas and waiting rooms, etc...

Its main missions are:

- Advice on projects and decoration (moodboards)
- Space optimization: design and production of 2D plans
- Proposals for complete layouts: design and production of 3D plans

HOTEL MOLITOR, PARIS - FRANCE

BESPOKE PROJECTS : BE UNIQUE !

Our bespoke projects division is available to offer you products that meet with **specific requests related to your brand identity** (charters, logos, etc.) or to **particular functions or made-to-measure design requirements**.

- **Marking:** different types of logo, short texts or graphic design using either laser cutting or silk-screen printing on either metal or OTF.
- **Special colours:** RAL (lets you make finer distinctions between colours) or other colours on request.
- **Adaptations:** format modification, reinforcement, fireproofing on OTFs that allow it.
- **Attachments:** to the floor or by cable.
- **Manufacturing/cushioning:** thanks to the group's other areas of expertise, we can offer you made-to-measure cushioning (change of size, finish) as well as parasols in your colours or with very different finishes.
- **Made-to-measure:** thanks to the expertise of our industrial facilities and our various partners (wood, textiles, etc.), we are able to offer you made-to-measure metal products to your specifications. Personalise all your outdoor equipment as you please...
- **Packaging:** personalised graphics.
- **Lamps:** for business gifts or to mark your brand, we can customise your outdoor lamps (colours, branding).

Parisienne 21

Fermob offers a customisation service for Parisienne 21 chairs and armchairs. A name, a commercial logo or any other message can be applied to a steel plate fixed to the back of the chair using high-precision laser cutting or silk-screen printing. This elegant detail is an excellent way for restaurants, hotels and other professional establishments or organisations to reinforce their brand identity.

GARDEN OFFICE

WORK AND FRESH AIR GO HAND IN HAND

Garden Office is a range of products for creating open-air offices and attractive communal spaces that encourage interaction and sharing among colleagues.

The Garden Office concept includes various product ranges:

- **Innovative ranges developed specifically for working outdoors:** Adadesk, Bolder
- **Different types of products:**
rocking desk, modular table, round table, stool, counters, high table
- **The best brands reworked for this specific purpose:** Luxembourg Work

With Garden Office, Fermob draws on its expertise to provide a solution for new working methods. It's an innovative way to reconcile work and well-being by making the outdoors a new space for work, breaks or informal meetings.

COLLECTIONS
AT A GLANCE

THE FURNITURE COLLECTIONS

Fermob has been reinventing outdoor furniture with the same passion for more than 30 years, combining innovation with **design and durability**.

The brand's signature is practical furniture, offering exceptional comfort, available in a **range of exclusive colours**, to transform any outdoor area into a **unique experience** for everyone, thanks to its Dining, Lounge and Smart Furniture collections.

For shared moments of fun, relaxation or work... Fermob designs and decorates outdoor areas elegantly, with products ranging from chairs to planters.

Epitomising French lifestyle and that "*je ne sais quoi*" that France is known for, Fermob's collections combine style with practicality to enhance any terrace or garden.

INSPIRED DESIGN AND INNOVATION

Fermob furniture is reputed for its **practicality**, sleek lines, vibrant colours and elegant designs. Whether it originates from a collaboration with a famous designer or was created by Fermob's Design Studio, every item is designed to associate **ergonomics and style**.

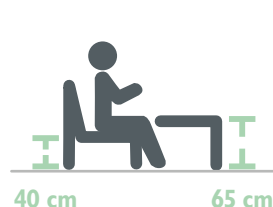

DURABILITY

The brand uses **robust materials**, such as steel and aluminium, and **paints** known and proven to resist **harsh outdoor conditions**, thus ensuring exceptional durability for each piece.

PROTECTIVE COVER FOR SUNLOUNGERS - ALIZÉ
HEADREST 44 X 15 X 5.5 CM - COLOR MIX

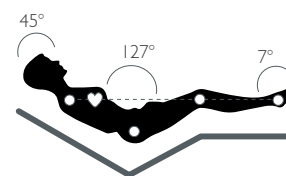

The **“zero-gravity” position**, as found on the Alizé sunlounger, is **perfect for relaxing** and is widely recommended by medical professionals.

It is this position, with the legs positioned slightly above the heart, that the body adopts in a weightless state. The position was named by NASA in the 1970s. The sensation of gravity is reduced seven-fold, similar to when the body is floating in water.

The legs are raised and the thighs and trunk form an angle of 127 degrees, thereby :

- Significantly easing pressure on the lower back and spine.
- Reducing tension in the lower back muscles.
- Promoting improved blood flow in the legs and reducing strain on the heart.
- Freeing up the rib cage and allowing the lungs to expand, which improves oxygenation.

Zero gravity is reached by raising the feet (7°) and raising the backrest to the maximum (45°).

ACCESSORIES & PARASOLS

COLLECTIONS

Fermob applies its know-how, expertise and audacity to the **decoration of outdoor areas**. For more than a decade, the brand has been proposing **decorative accessories** to complement its main product lines: outdoor furniture.

Our accessories are the little details that you **fall in love** with (coat stands, hooks, trays, vases, single-stem vases, trivets and even cushions) to **accessorise outdoor areas**. They are designed for use outdoors but can also be used indoors to **decorate just about any room in your house**.

This season's new addition to the collection is a wall-mounted **mirror with trinket tray**.

THE IMPORTANCE OF DECORATIVE ACCESSORIES

Decorative accessories are essential elements of the **brand's aesthetic, atmosphere and identity**, playing a key role in a personalised customer experience. They bring added value to furniture by providing an additional **emotional dimension**.

Accessories such as different shaped cushions with varied patterns, comfortable seat cushions, original single-stem vases, colourful trays and trivets, bird feeders or even a fouta can bring a unique, personal touch to any space, creating a **warm, welcoming atmosphere**. They also make perfect gifts.

OUTDOOR TEXTILES

For its textile accessories and parasol, Fermob works with suppliers with proven **outdoor know-how** (Serge Ferrari, Margueroy, Tuva Textile, Vlaemynck, etc.) to guarantee impeccable, high quality products for all kinds of uses.

Cushions, foutas, garden ponchos and placemats are designed in collaboration with experts (stylists, designers, industrial specialists, etc.) selected for their quality standards. Our fabrics are made by French or European partners. Our **Jacquard and printed fabrics and Batyline® OTF** (Outdoor Technical Fabric) are made in France.

The fabrics used for our textile accessories and parasol:

- have **technical properties** to ensure lasting resistance to life outdoors without being damaged (UV colour resistance, water-repellent & stain protection treatments, mould resistance, etc.)
- **are easy to clean** (removable covers that can be machine washed at 30°)
- comply with **standards** and are tested for their robustness
 - Colour resistance to the sun and weather
 - Resistance to abrasion and friction
 - Tear resistance

Colour-fast
in the sun

Water-repellent
treatment

Breathable:
quick-drying

Anti-stain
treatment

Tearproof and
resistant to abrasion

Removable
covers

Machine
washable

The **metal accessories** are made in the same factories as our furniture. They are designed according to the same quality standards (steel, anti-UV powder paint).

Like all Fermob products, our accessories integrate the brand's basic standards: **creativity, design and colours**, to ensure **style, originality and practicality**.

THE LIGHTING COLLECTIONS

IN JUST A FEW YEARS, FERMOB HAS BECOME A LEADING NAME IN DECORATIVE AND AUTONOMOUS LIGHTING FOR BOTH INDOOR & OUTDOOR SPACES.

It all began in 2015, when Fermob released the market's very first portable BALAD lamp. Thanks to this product, Fermob became a pioneer with a new concept.

INNOVATION FIRST...

CREATION

Apart from quality, **design by is a major commitment for Fermob**. With an approach **inspired by changing lifestyles** and history, the products also combine Fermob's **commitments to simplicity, a feeling for detail and, of course, aesthetics**. As well as forming part of our **overall design by vision**, the collections are also in step with our observations of **new uses**. Fermob offers a variety of products (table lamps, pendant lights, wall lights, etc.) for a range of lighting scenarios (with different light temperatures, intensities, etc.).

DESIGN

Our development protocol takes everything into account: ergonomics, weight, ease of handling, removable and sturdiness. The result is a product that is built to last & brings genuine delight. Fermob approaches new product developments with a manufacturer's eye, putting together its own know-how and connecting with the best partners for growth.

To support its growth in the lighting market, Fermob set up a **dedicated working group to combine different areas of expertise**. The brand also partnered up with **Smart & Green**, a start-up in Grenoble **specialising in development of portable and smart LED lights** (using Bluetooth 4.0 Smartmesh® technology).

PRODUCTION

Production is entrusted to the **IPW industrial group** created by a joint French and Chinese team, and working closely with Fermob teams. **Specialising in plastic injection and electronics**, IPW develops LED lighting control software and systems.

Innovative products that are affordable and accessible in terms of price point and ease of use, with strong environmental credentials (eco-designed, able to be taken apart, and energy efficient, due to use of LEDs)

FERMOB: A UNIQUE KNOW-HOW

THE METAL: WONDERFUL MATERIAL OF IDEAS

For our furniture, we choose to use **metal** (over 98% recyclable) – the “**material of ideas**”, as Gustave Eiffel put it – on account of its incredible versatility. The metals we use are **premium-grade steel and aluminium**.

STEEL

- Fermob's original expertise
- Stable and durable
- Creates an elegant design

ALUMINIUM

- Malleable
- Light-weight
- Easy to weld

Whenever our designers and technicians are working on a new product, **anti-corrosion performance is always top of mind**. We're constantly thinking of ways to eradicate, or at least reduce, areas that could be prone to corrosion because they are not protected or treated.

FERMOB: A UNIQUE LIGHTING IDENTITY

Fermob lighting builds on the **fundamentals of the brand: ease of use, versatility, continuous innovation, a design by approach**. Fermob, in tune with contemporary living, offers a **variety of products for a range of lighting scenarios** (with different light temperatures, intensities, etc.) & different accessories for **a unique user experience, just right for every different moment of life**.

Whether wired or wireless, all Fermob lighting products have something in common – **their simplicity and versatility in use**. Designed for **your table or floor, or to be portable or wall-mounted** Fermob lights offer **complementarity in use**: creating ambience at the table, lighting a bar space, highlighting a poolside area, marking out a path, etc.

A perfect combo for unique user experiences, just right for every different moment of life.

MAKE A LASTING IMPRESSION,

BUT NOT ON THE ENVIRONMENT!

As part of a **continuous improvement** approach, combined with genuine **“lighting quality” expertise**, the brand designs lighting that combines **eco-design by with environmentally-friendly materials and processes** to use exactly the right amount of energy. We also pay careful attention to the **life span of our products** and are improving this factor for all of our products.

Our **eco-design** approach allows us to go further in terms of the **repairability** of our luminaires, enabling us to design products that are easy **to disassemble** right from the outset. As part of this **deliberately chosen approach**, at Fermob we try always to incorporate replaceable parts into all our lamps and lights in order to extend their **lifetime**, and this includes those still under warranty.

95% of Fermob’s lighting products can now be taken apart, repaired and recycled!

SELECTION OF ECO-RESPONSIBLE MATERIALS AND COMPONENTS

All of our (In & Outdoor) lighting products have to meet several rigorous criteria from design through to production. Fermob guarantees good quality products:

- Selection of **premium quality materials** and **electrical components** (aluminium, polyethylene, LED, glass, etc.),
- Use of materials that are known for their **resistance to Outdoor conditions**, procured from suppliers with a good reputation at international level,
- 100% polyester powder coating **with UV resistance**,
- A **dedicated quality team**.

All our lighting is certified in a 2-stage procedure:

- The product design by work includes performance of several tests in accordance with IEC 60598, testing component strength and uses (e.g. NF EN 60529, etc.)

IEC 60598 : The international standard, for all lighting that incorporates electric light sources, which specifies general requirements for operation at power supply voltages up to 1000 V. The requirements and the corresponding tests for this standard are concerned with classification, marking and mechanical and electrical construction.

SELECTION OF ECO-RESPONSIBLE MATERIALS AND COMPONENTS

LED

Recyclable and far **more environmentally-friendly** than all other types of lighting. They offer a long life span, with 85% lower energy consumption **and no toxic mercury content**.

DURABLE AND RECYCLABLE HIGH-PERFORMANCE ELECTRONIC AND ELECTRICAL COMPONENTS

E.g. battery and LED PCB module
(PCB: Printed Circuit Board)

ENVIRONMENTALLY-FRIENDLY PAINTS

Better for the environment and for our health. The powder coatings used by Fermob are **solvent-free**. They are used in a **zero waste system** and are guaranteed for outdoor use.

METAL

An **eco-responsible material**. Iron and aluminium are **98% recyclable materials**, and have the benefit of a mature value chain at international level.

POLYETHYLENE OR POLYCARBONATE DIFFUSER

Very strong materials, with the benefit of being **recyclable even after being recycled**.

MINIMALIST PACKAGING

Plastic-free packaging using just the right amount of material

DISASSEMBLING LIGHTING TO IMPROVE LIFE SPAN

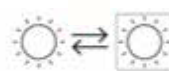

Fermob **considers the Design** by of its lighting products to **make them easier to disassemble** and **to extend their life span**. Several components can be replaced (see detailed list on p.235 and in Price list).

Each package is marked with **repairability symbols** indicating the **type of disassembly** (requiring a professional or able to be completed by user) and specifying the **type of repairability** (light source and/or control unit).

Detailed key to repairability symbols:

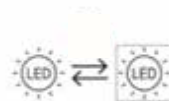

Light source can be replaced by a professional

Light source can be replaced by user

Light source (LED only) can be replaced by a professional

Light source (LED only) can be replaced by user

Control device can be replaced by a professional

Control device can be replaced by user

Light source cannot be replaced

Control device cannot be replaced

Thus, in line with our IREP index, various "product repairability" videos are proposed via our online sales sites, to simplify the experience of users wanting to repair their Fermob lights.

Since 1st September 2021, in accordance with the requirements of the AGEC law:

- the new labelling of all household appliances, light sources and lighting products (Light output ≥ 60 lm)
- the new method for analysing energy consumption.

Repairability symbols

QR code giving access to the European database for energy labelling - EPREL.

It fills in the technical information & details (materials, dimensions, energy class, etc.).

GLOSSARY

ABS

Acrylonitrile Butadiene Styrene (ABS) is a relatively rigid, lightweight, impact-resistant and mouldable thermoplastic polymer (a type of styrenic polymer, to be exact).

BYPASS

A bypass is a circuit that avoids a device or system.

BATTERY USE CYCLES

The battery's capacity gradually decreases with the use of the light. This is a natural phenomenon. A use cycle includes a complete discharge and recharge of the battery (if the battery is discharged to 50% and then recharged to 100%, this is equivalent to 1/2 cycles). On average, Fermob lights vary between 300 and 500 cycles of use per battery.

LUMINOUS FLUX - LUMEN (lm)

In photometry, luminous flux is a measure of the power of a light source as perceived by the human eye. It's the most commonly used indicator of the total amount of light emitted by a light source in all directions.

IK INDEX

Defines the strength of a device against knocks and impacts, but not against falls. The test is carried out with a steel vertical or pendulum hammer. The rating ranges from 0 to 10 (according to standard NF 62262).

IP INDEX

Defines the degree of protection provided by the equipment against the penetration of solid matter (first figure) and liquid matter (second figure). The rating ranges from 00 to 68 (according to standard NF EN 60529).

LED - LIGHT EMITTING DIODE

An electronic optical component that converts the electric current passing through it into light. This has many advantages:

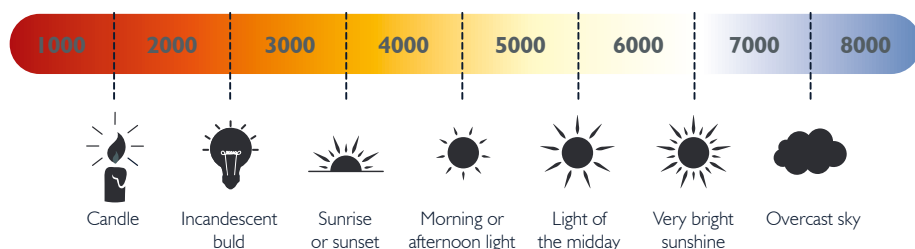

- economical
- ecological
- instant illumination
- long lifetime (25,000 to 100,000 hours)
- no critical materials (e.g. no mercury)

POLYETHYLENE

Polyethylene is one of the most common thermoplastic resins in use today. It is known for its excellent impact resistance.

COLOUR TEMPERATURE - KELVIN (°K)

Measures the colour temperature of the light. It indicates whether white light is warm (yellow hue) or cool (blue hue). It varies depending on the source. The higher this figure, the more bluish-white the colour temperature, while light with a lower colour temperature tends towards the red end of the scale.

ALTER THE COLOUR TEMPERATURE TO CREATE THE RIGHT LIGHTING MOOD.

This feature lets you adjust the colour temperature to the task at hand. Warm white (2,700 to 3,300°K) creates a comfortable mood that's perfect for relaxing. Neutral white (4,200 to 4,500°K) is more soothing and energising. Cool white (5,500 to 6,500°K) is closest to natural daylight, with a slightly blue hue that boosts focus and concentration.

FERMOB'S IP & IK RATINGS AND LUMENS AT A GLANCE

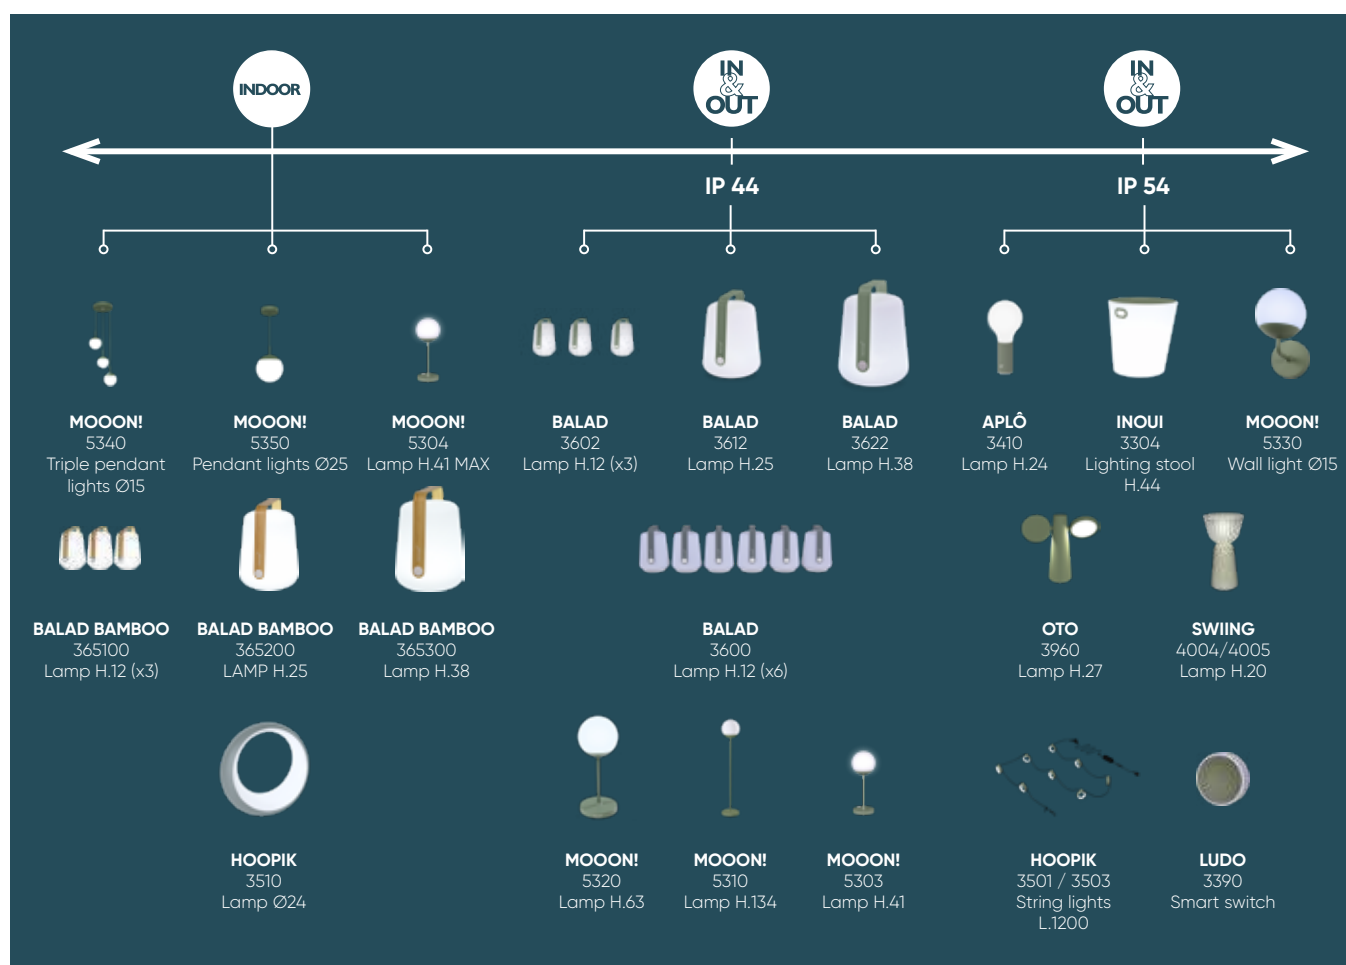

Our lamps and lights are all designed for one or more specific uses right from the conception stage, which therefore makes it essential to decide the IP (ingress protection) and IK (impact protection) ratings and desired power output (lumens) early in the process.

As well as the IP rating, certain of the materials used, such as bamboo, are deliberately intended for indoor use only. Bamboo adds elegance to home interiors while at the same time providing lamps and lights with quality and durability.

IP INDEX

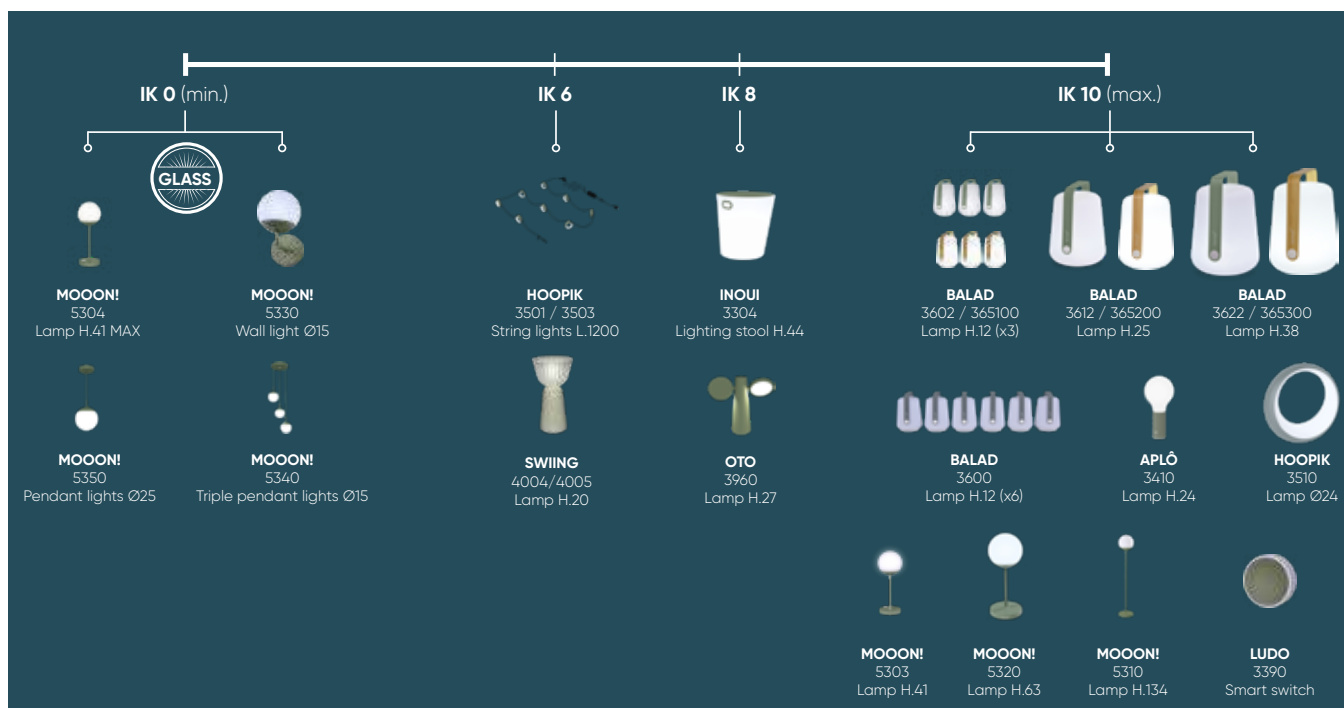

Defines the degree of protection provided by the equipment against the penetration of solid matter (first figure) and liquid matter (second figure). The rating ranges from 00 to 68 (according to standard NF EN 60529).

IK INDEX

Defines the strength of a device against knocks and impacts, but not against falls. The test is carried out with a steel vertical or pendulum hammer. The rating ranges from 0 to 10 (according to standard NF 62262).

LUMINOUS FLUX - LUMEN (lm)

In photometry, luminous flux is a measure of the power of a light source as perceived by the human eye. It's the most commonly used indicator of the total amount of light emitted by a light source in all directions.

BALAD BAMBOO

FERMOB, A RANGE OF LIGHTING

INNOVATIVE AND CONNECTIBLE

Over the last few years, Fermob has become the **leading brand in the world of autonomous connectible lighting**.

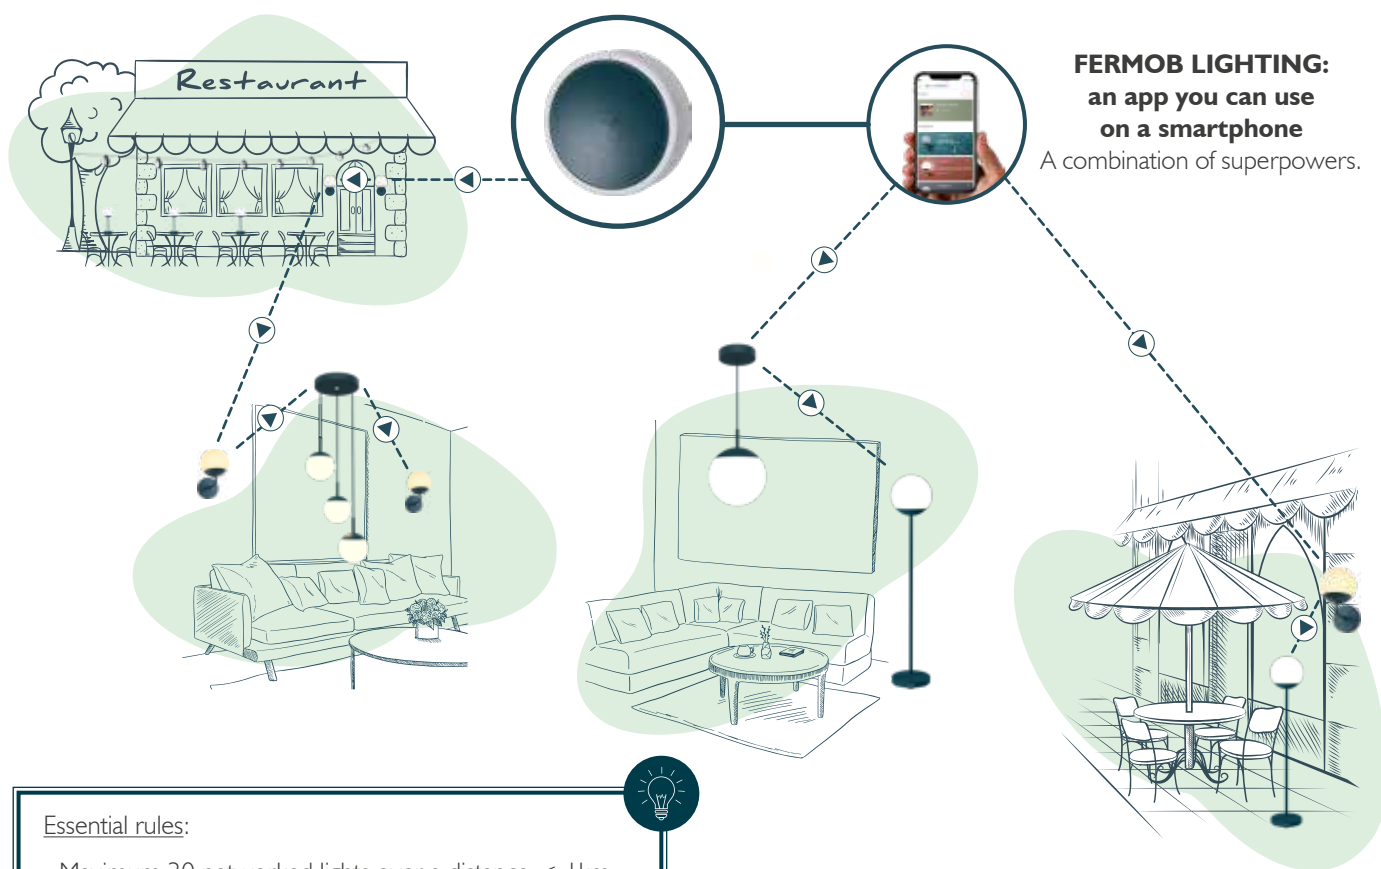

To work with a variety of lifestyles, the Fermob catalogue offers a **decorative and intelligent solution using Bluetooth technology**.

LUDO, the Fermob smart switch

A combination of technology to control the lighting atmosphere provided by all Fermob smart lights.

FERMOB LIGHTING: an app you can use on a smartphone

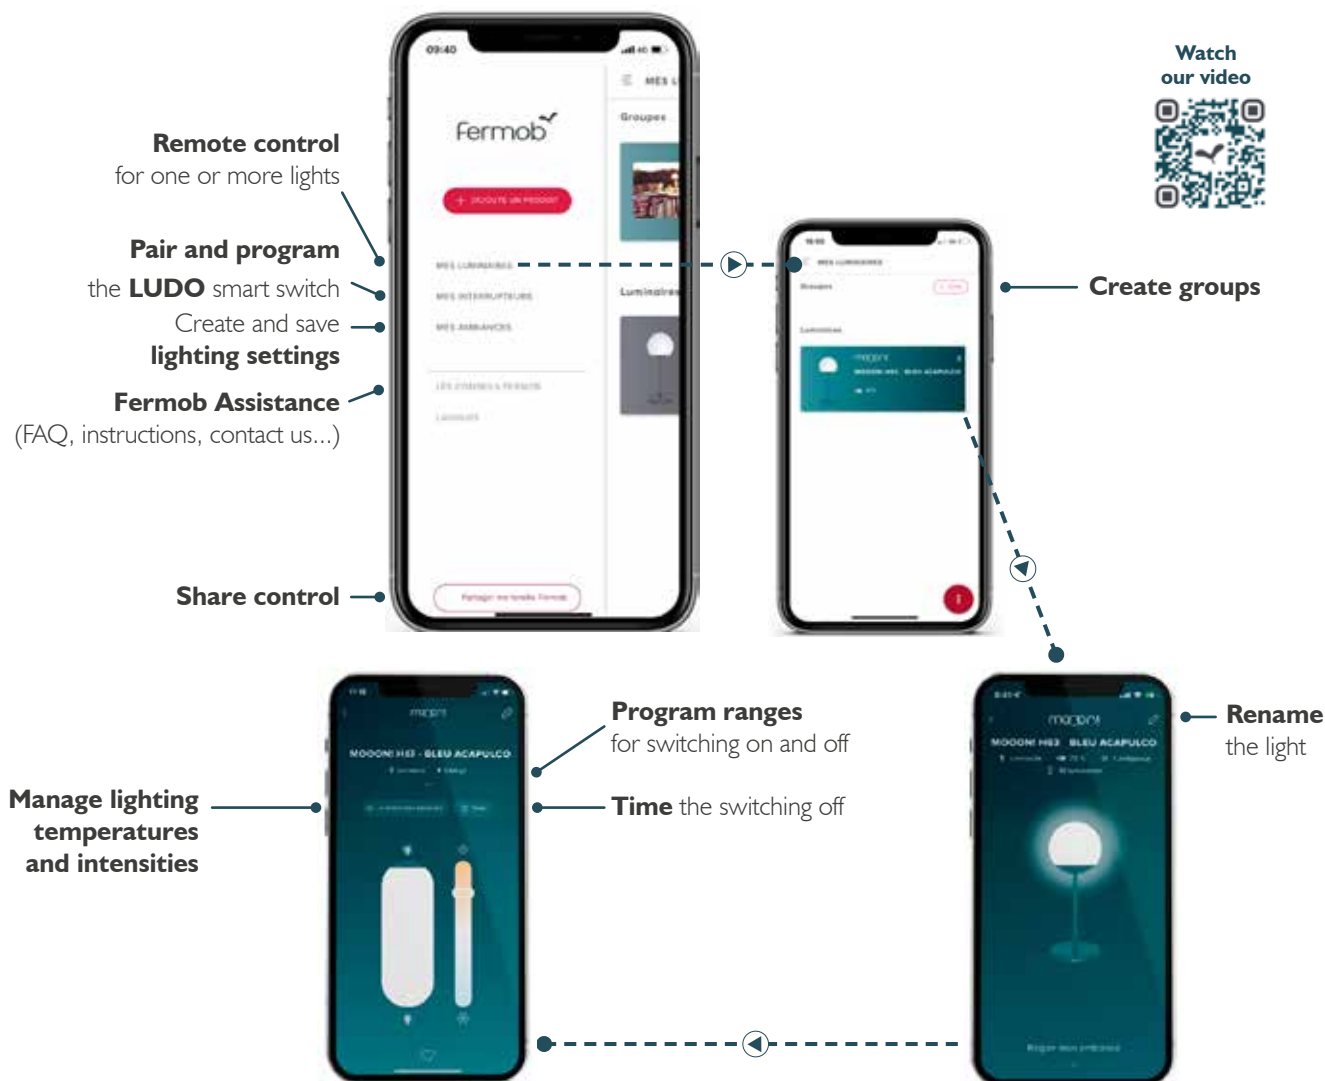

A combination of superpowers.

Essential rules:

- Maximum 30 networked lights over a distance < 1 km
- Distance from smartphone to light < 10m
- Distance from switch to light < 15m
- Distance between lights < 10m
- No obstructions (e.g. wall)

WHAT ARE THE FEATURES OF THE FERMOB LIGHTING APP?

The Fermob Lighting app is compatible with all smartphones equipped with Bluetooth.
The app is updated regularly, as products are launched. **MAKE SURE YOU UPDATE IT!**

Any questions?

Go to the Fermob Lighting FAQs on www.fermob.com or directly from the app.

A LOOK AT FERMOB SMART LIGHTS

**FERMOB SMART LIGHTS OFFER A UNIQUE CUSTOMISED
EXPERIENCE, ACCESSIBLE TO EVERYONE.**

LI200

MUCH MORE THAN A GARLAND...

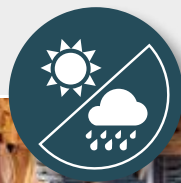

HOPIK LI200 is a fully fledged aerial lighting solution.

It consists of a 12-metre matt black cable, including a 6-metre hanging cable, plus 8 LED spotlights that are adjustable through 360° and 2 hook mechanisms, one at each end.

The dimmer switch, which is easy to access once installed, means it's equally suited to both a muted lounge area and a large, brightly lit table.

What's more, it's equipped with Bluetooth technology and can be controlled remotely with the Fermob Lighting app or the Ludo connected outdoor switch.

INDOOR

WHY NOT INVITE FERMOB INDOORS?

For more than 30 years, Fermob has been applying its expertise to the overall design of outdoor areas.

The brand's collections shake up current trends while remaining timeless. The brand continues to sweep aside the barriers between indoors and out, staking its claim to intelligent usage and ensuring the promotion of feel-good design.

Fermob is extending its horizons with **new materials** and exploring all areas of expression to help individuals and professionals alike in their quest **to furnish their spaces**, offering a host of iconic products to be rediscovered as well as new products.

Certain iconic pieces have thus entered the home, with the **wood and fabric version** of Studie, for example, or the **leather** Surprising and Bistro chairs.

We have combined our **metal-working expertise** with **new materials** (particularly indoor fabrics and FENIX®), to propose sleek, **simple designs** with **clean lines** and **generous shapes**.

Dining rooms, cosy corners, elements for the entrance hall... All our pieces are designed to furnish, accessorise and illuminate your indoor areas with style, simplicity and elegance.

And this is only the beginning... Fermob has only just started its conquest of our indoors, creating **comfortable, welcoming** and **practical** areas with the brand's signature **joie de vivre** and **generosity**.

To promote Fermob's indoor offer: layout proposal for a specific **Indoor Corner**.

0102 - LEATHER CHAIR

Steel flat frame
Leather covered steel slats seat
Leather covered steel slats backrest
Plastic clips for safe folding and unfolding
One-piece steel cross-pieces
Available colours: see limited colour chart

010214 ● Nutmeg
010221 ● Acapulco Blue

010242 ● Liquorice

The slats of the Bistro chair are upholstered in full-grain leather, reflecting its quality and durability. A natural, durable material, this mineral-tanned leather is dyed through, making it highly resistant. The semi-aniline leather offers guaranteed protection against stains and ageing.

Surprising's leather is full-grain and really strong, and it will hold up remarkably well over time. This vegetable-tanned leather, a natural process that respects the environment, is dyed in the mass, giving it a clean reverse side and a tinted edge, a guarantee of superb quality. A Scotchgard finish gives it all its waterproof properties and protects the leather from stains and ageing.

GLOSSARY

ABS

Acrylonitrile Butadiene Styrene (ABS) is a relatively rigid, lightweight, impact-resistant and mouldable thermoplastic polymer (a type of styrenic polymer, to be exact).

ABRASION

Wear caused by rubbing.

ACRYLIC

Synthetic fibre that is soft and silky to the touch, does not pill, and is ultra-light.

- extremely resistant to tearing and wear
- rotproof (i.e. prevents the formation of mould)
- keeps its shape
- UV and fade resistant
- does not retain heat or moisture
- resistant to temperature variations (-30° to +70°C)
- resistant to chemicals
- easy to clean: machine-washable at 30°C, no ironing required.

All our acrylic fabrics are water-repellent.

ANTI-UV

Anti-UV treated products are resistant to alteration caused by ultraviolet rays (present in sunlight and moonlight), meaning colours do not fade over time. All Fermob products are UV-resistant.

BATTERY USE CYCLES

The battery's capacity gradually decreases with the use of the light. This is a natural phenomenon. A use cycle includes a complete discharge and recharge of the battery (if the battery is discharged to 50% and then recharged to 100%, this is equivalent to 1/2 cycles). On average, Fermob lights vary between 300 and 500 cycles of use per battery.

BYPASS

A bypass is a circuit that avoids a device or system.

CAST IRON

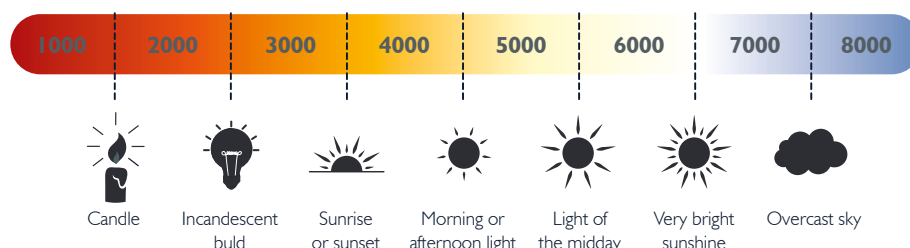

Cast iron is a carbon-rich iron alloy. Its density, weight and sturdiness mean that it is ideally suited for stability purposes.

COLD-ROLLED STEEL

The laminated steel is passed through a set of rollers, which transform it into material (e.g. into sheet for table top). Cold rolling is Fermob's technique of choice, since it makes the steel resistant, gives it a precise, uniform thickness, and promotes good paint hold.

COLOUR TEMPERATURE - KELVIN (°K)

Measures the colour temperature of the light. It indicates whether white light is warm (yellow hue) or cool (blue hue). It varies depending on the source. The higher the figure, the more bluish-white the colour temperature, while light with a lower colour temperature tends towards the red end of the scale.

DRALON®

A woven textile made from synthetic fibre that offers excellent resistance to water, stains and UV rays. It is soft in texture, bright in appearance, rot-proof and easy to clean.

ELECTROLYTIC COATING

A surface treatment originally used in the automotive industry. An electrophoresis paint (sub-layer) technique where a part is immersed in a bath of water-soluble paint. Electrolytic coating means that the product benefits from Very High Protection treatment and is suited to intensive use or use in extremely wet/humid environments.

ELECTROGALVANISING

Protecting an object by applying a layer of zinc using electrolysis (electrical energy).

ELECTROSTATIC

An eco-friendly painting technique that involves using powder instead of solvent-based paints. An electrostatic force attracts the powder coating to the metal, achieving optimal coverage. The coating is then baked onto the furniture.

FOAMS

ETHYLENE-VINYL ACETATE (EVA) FOAM

A dense, compact, hard-wearing foam (no cells or air bubbles) that's lightweight and easy to mould.

HIGH-RESILIENCE PU FOAM

A polyurethane foam selected by Fermob for its ability to return to its original shape after deformation, even following an extended period of use.

OPEN-CELL FOAM

A foam that allows liquid to pass through. It does not retain water and dries very quickly, meaning that the cushion does not stay wet.

POLYESTER FOAM

A PU-type foam with open cells and variable density. This versatile foam is typically used to make padding and occasional seats.

POLYETHYLENE FOAM (closed-cell)

A foam used for thermal insulation and for air-, water- and dust-proofing.

POLYURETHANE (PU) FOAM

A high-quality foam known for its firmness and comfort. It consists of fine closed cells enclosing a low thermal conductivity gas. It makes an excellent thermal insulator.

RETICULATED FOAM

A foam with very fine, regular closed cells. This is a rot-proof and waterproof foam.

GALVANISATION

Iron protection process that involves dipping a part into a bath of melted zinc.

HYDROFORMING

A manufacturing process used for Cadiz's armrests, in which a material is shaped by injecting a high-pressure fluid and working with the material. This process was previously mainly used in high-tech industries such as aerospace.

IK INDEX

Defines the strength of a device against knocks and impacts, but not against falls. The test is carried out with a steel vertical or pendulum hammer. The rating ranges from 0 to 10 (according to standard NF 62262).

IP INDEX

Defines the degree of protection provided by the equipment against the penetration of solid matter (first figure) and liquid matter (second figure). The rating ranges from 00 to 68 (according to standard NF EN 60529).

JACQUARD FABRIC

On a Jacquard fabric, the patterns are made by criss-crossing threads. The Jacquard loom, developed in 1801 by Joseph Marie Jacquard from Lyon, is capable of creating weaves with complex patterns.

LED - LIGHT EMITTING DIODE

An electronic and optical component that transforms the electric current passing through it into light. It has many advantages:

- economic
- ecological
- instant lighting
- long service life (25,000 to 100,000 hours)
- no critical materials (e.g. no mercury)

LOUNGE OTF

Outdoor Technical Fabric (OTF) is a Batyline® fabric manufactured in France by the world's leading firm, Serge Ferrari. This high-tenacity 100% polyester thread is protected with a solution-dyed PVC cover for exceptional colour-fastness. OTF keeps its shape, is light, flexible and sturdy, and does not deteriorate over time. It is resistant to both moisture and micro-organisms, and is treated with an anti-fungal product. The tight weave, coupled with the performance characteristics of Batyline®, give this material a textile-like feel and make it ideally suited for outdoor use. Lounge OTF is a unique material which combines the elegance of a natural-looking textile with the performance characteristics of a technical fabric.

LUMINOUS FLUX - LUMEN (Lm)

In photometry, luminous flux is a measure of the power of a light source as perceived by the human eye. It's the most commonly used indicator of the total amount of light emitted by a light source in all directions.

POLYETHYLENE

Polyethylene is one of the most common thermoplastic resins in use today. It is known for its excellent impact resistance.

POLYPROPYLENE

Polypropylene, also known as PP, is a semi-crystalline resin, a synthetic fibre from the family of thermoplastic polymers. It has a number of excellent properties that are of great benefit in outdoor textiles, including high water resistance (water repellent) and good UV resistance. It is made from non-toxic, non-allergenic substances (Oeko-Tex class I) and is recyclable.

ROTPROOF

Guarantees against the formation of mould over time. This is an important guarantee for outdoor products.

SILENCING PADS

An exclusive, patented technology that allows furniture to slide effortlessly across the floor and features an integrated shock absorber to reduce vibrations. Comes as standard on Luxembourg & Salsa.

NOISE REDUCTION OF 14 DB = 10 TIMES QUIETER!

STAINLESS STEEL

Stainless steel is an alloy of steel and chromium that is highly resistant to corrosion and rust. Fermob uses stainless steel to make the screws for its products.

SOLUTION-DYED

Fermob uses solution-dyed textiles (the dye is applied to the fibre, not the surface). This dyeing technique means that the colour lasts five times longer than a conventional dye.

TEXTROL®

Natural plant oil-based wood saturator that helps wood retain its natural appearance for a long time. Does not form a film or chip off, does not peel away over time, does not darken under the effect of UV rays. Fermob uses this product on its Bistro Natural chairs.

WATER-REPELLENT

A water-repellent fabric does not instantly absorb water droplets. Instead, water slides off the surface. It reinforces the resistance to stains and mould. However, if the water is not removed quickly, it will end up being absorbed into the fibre (water-repellent is not the same as waterproof).

YARN-DYED ACRYLIC

A yarn-dyed synthetic fibre is dyed on the yarn after it has been manufactured.

SYMBOLS

RECOMMENDED USAGE

Each of our products comes with a recommended usage setting, so you can better cater to your own customers' requirements and keep the guarantee valid:

Domestic : product designed for private use in non-public spaces such as gardens, winter gardens, patios, terraces and balconies.

Professional: product designed for professional use in supervised public spaces such as restaurants, outdoor pools, beaches and recreational facilities.

Intensive professional: mobile product, not fixed to the ground, designed for professional use in unsupervised public spaces such as motorway service stations, public parks and squares that are accessible around the clock.

COVERS & LEG RISERS

Protective covers for tables. Colour: Light Grey. Material: polyamide.

Colour: Light Grey | Material: polyamide.

Breathable and protection from dirt for furniture during the season. They protect your furniture while creating a ventilation system that allows water to drain away. Please note that these are not waterproof covers.

Tables must always be wedged, even with a protective cover, to prevent moisture stagnation and the appearance of rings.

3150 - CHAIR & ARMCHAIR STACK COVER

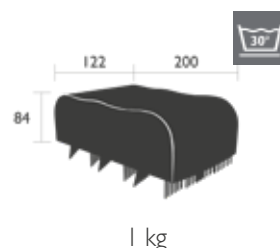

Polyester fabric

Max. storage capacity: 36 chairs and armchairs

Cadiz, Facto, Lorette, Luxembourg, Monceau, Stripe and Studie

Do not use as a winter cover

THE FERMOB GUARANTEE

CHARTER

EUROPEAN FURNITURE GUARANTEE

When we design our products, we pay special attention to three key aspects:

- making sure the piece will continue to fulfil its intended purpose for many years to come
- anticipating how it will age as time passes
- designing it so it is suited to our customers' requirements.

As a manufacturer, we have a duty to guarantee that our products are fit for purpose, no matter how our customers use them.

We never stop listening to our customers. That is why we have amended our European Furniture guarantee to reflect painstaking laboratory testing and customer feedback.

Because we use only the highest-quality materials and finishes, we are now in a position to go one step further and offer two separate guarantees – a **5-year functional guarantee** on all our items of furniture, plus a **2-year ageing guarantee**, provided that the product is used as per our recommendations.

FUNCTIONAL
GUARANTEE
5 YEARS

AGEING
GUARANTEE
2 YEARS

Each of our products comes with a recommended usage setting, so you can better cater to your own customers' requirements and keep the guarantee valid:

1. **Domestic:** product designed for private use in non-public spaces such as gardens, winter gardens, patios, terraces and balconies.
2. **Professional:** product designed for professional use in supervised public spaces such as restaurants, outdoor pools, beaches and recreational facilities.
3. **Intensive professional:** mobile product, not fixed to the ground, designed for professional use in unsupervised public spaces such as motorway service stations, public parks and squares that are accessible around the clock.

• 5-YEARS FUNCTIONAL GUARANTEE

Fermob guarantees that products will remain fit for the purpose for which they were designed for 5 years. The guarantee covers all functional aspects of the product such as welding, fasteners, rivets and folding.

If a product is not used as per Fermob's recommendations, the functional guarantee is reduced to 2 years.

• 2-YEARS AGEING GUARANTEE

The speed at which a product ages depends on how carefully it is treated by customers. Please read the exclusions so you can advise customers how to care for and maintain their products.

The ageing guarantee covers premature and abnormal deterioration in the appearance of the product's materials.

Fermob's 2-year ageing guarantee applies in Europe (excluding Russia) only. Elsewhere, the guarantee is 2 years for aluminium furniture and 1 year for steel furniture.

Please note: products marked "Indoor" are suitable for indoor use only. Failure to comply with this instruction from the manufacturer will invalidate the product guarantees.

Scan the QR code to find all the information you need about the warranty on your Fermob products:

PROTECTION & MAINTENANCE

FOR YOUR PRODUCTS

Fermob makes every effort to ensure that all its products are easy to maintain, thereby prolonging their lifespan.

See our tips for:

- Maintenance and cleaning
- Protecting your products from the elements
- Extending their lifespan (spray paint, rust inhibitors, spare parts, instructional videos)

Scan the QR codes to find information on protecting and caring for your Fermob products.
